

# LLOYD D LANDSMAN MD

plastic & cosmetic surgery ≡≡≡

994 W Jericho Tpke Suite 102  
Smithtown NY 11787  
631-864-4111 drlandsman.com

## Pre-Op Visit Day Confirmation

1. Patient has read and reviewed with a staff member the informed consent and has been given the opportunity to ask any questions. He or she has also been given the opportunity to discuss anything further with Dr Landsman. The patient has already been seen by Dr Landsman in a formal consultation on a previous day. The patient acknowledges that he or she has been fully informed of all issues relating to the proposed surgery including but not limited to the size and length of any potential surgical incision, the potential risks and complications, and the possible alternatives to the proposed surgery. The patient is aware that all plastic surgical procedures require 1 full year before the final result can be evaluated. It is also understood that touch up surgery to improve the final result may be necessary. Complications may occur and they are to be brought to our immediate attention by calling the office or the emergency service at **631- 864- 4111, 24 hours a day, 7 days a week. Email and text messaging are not an acceptable means of communication after the surgery has taken place.**
2. The patient has been given verbally and in writing specific pre and post operative instructions for their procedure. These are to be followed without any deviations. Any advice or alternative approaches not explicitly given by Dr Landsman or his staff, including information found on the internet, information provided by any other self subscribed persons including other health care professionals should be avoided as they will cause confusion. In the event that a person fails to notify our office and seeks care outside of our practice for post operative issues we are held harmless for improper care that may occur.
3. All medical decisions and surgical procedures are the sole responsibility of Dr Landsman and the anesthesiologist who is present on the day of surgery. The anesthesiologist decides what preoperative laboratory tests and or other tests are necessary for the particular procedure being done. Staff members are here to support the doctors and reinforce the decisions and the policies of the practice and the medical staff.
4. **All post surgical garments and appliances must be approved by this office prior to their use. The cost of garments and post operative appliances of any sort are the responsibility of the patient. Breast surgery patients are given a post operative bra and a strap complimentary; they are put on at the first post operative visit.**

5. **Any cancellations less than 72 hours prior to the day of surgery will result in loss of deposit plus \$1000 surcharge. Please allow up to 2 weeks to process your refund.**
